

# MAXI

THE IDEAL BOILER FOR ALL SMALL UTILITIES

## ELECTRIC STEAM GENERATORS

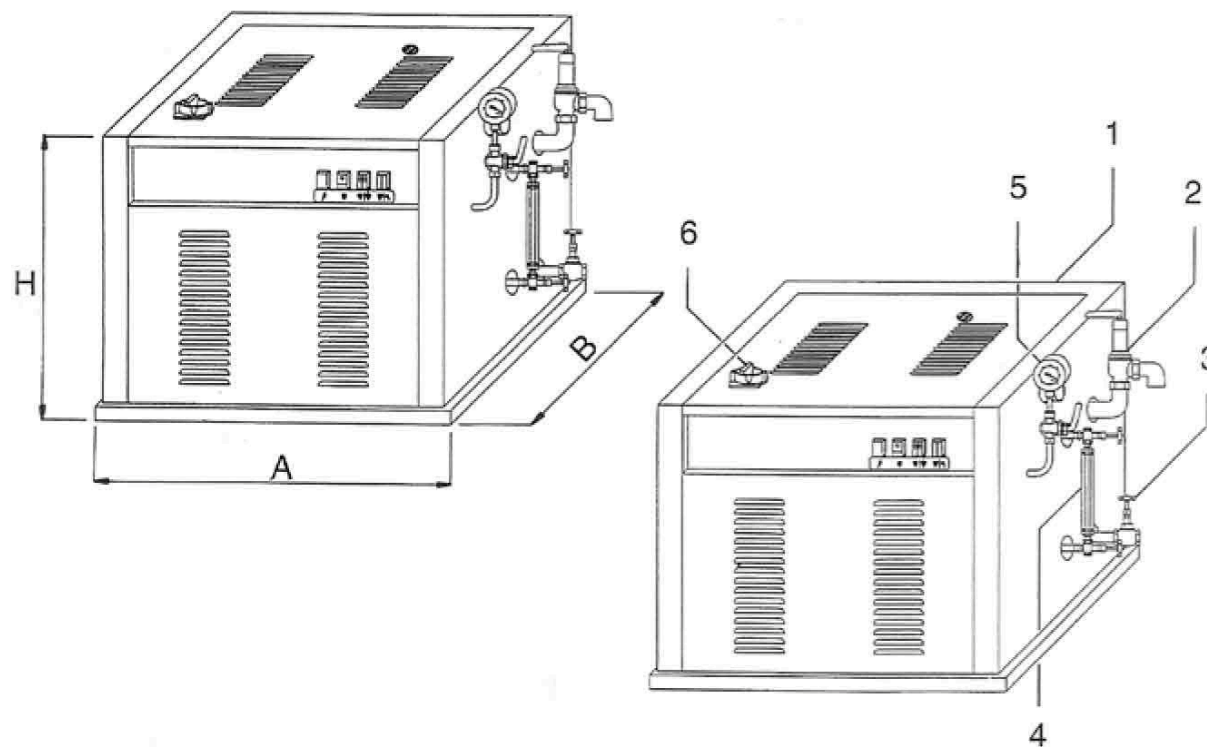

Electric and automatic steam generator, available in five versions, from 6,9 up to 120 kW. Feed water can be connected directly to the main water or from a condensate tank.

Steam generator MAXI produces a minimum of 9 Kg/h to a maximum of 170 Kg/h at operating pressure up to 8 bar.

Upon request custom made electrical automatic steam generators GEV Series. Capacity f500 kW/h. Pressure up to 12 bar.

# MAXI

It is particularly suitable in garment and dry cleaning factories for operating presses with polished surface (recommended for ironing cotton articles) or supplied with a special steam gun for fluffing up and ironing furs. It is realized with one or more resistances. The ideal boiler for all small utilities.

Service stairs & platform only by request - Indicative data
